***Please note: It is an offence to stock your dams or streams with fish that do not occur naturally in your area unless you have a permit to do so.***

## **Native Fish for Frog Ponds**

We highly recommend 'Pacific blue eye' – up to 30mm  
Others to try – 'Firetail gudgeon – up to 65mm and 'Crimson-spotted rainbow' – up to 120mm  
The larger size fish over 30mm may eat tadpoles, so you may wish to separate them until the tadpoles have reached a sufficient size.

**Note:** *'White cloud' are not a native fish – please avoid these*
